READING THE RESULT

- **Fit score 3.1 of 5.** The average result across all 8 competencies, weighted to the role. At 3.1 it sits above the Competent bar (3.0) - a conditional fit. It summarises the rows below; it is not a pass mark.
- **6 of 8 above the bar.** The candidate meets or exceeds the role bar (Competent, 3/5) on 6 of 8 competencies - Forward Strategy Setting, Critical Analysis, Sound Judgement, Outcome Ownership, Planning & Prioritisation, Resilience Under Pressure. That is how much of the role profile is already covered today.
- **2 below the bar.** 2 competencies fall short of the bar - Clear & Adaptive Communication, Coaching & Talent Growth. Below-bar signals where development is indicated, not that the candidate is unsuitable; these are the areas to probe in interview and plan support for.
- **3 clear strengths.** 3 competencies were scored 4 or 5 - Forward Strategy Setting, Critical Analysis, Outcome Ownership. A 4-5 (Strength / Significant Strength) means the behaviour showed consistently and beyond what the role requires: what the candidate brings from day one.

HOW THIS ASSESSMENT WORKS

- + Same assessment, same scoring: every applicant completes the identical online psychometric, removing interviewer bias.
- + Job-relevant: every competency maps to the role's success profile, and the bar is set before the assessment.
- + Consistent: the same competencies and 1-5 scale apply to every applicant for the role.
- + Objective: responses are scored against a fixed competency framework, not a single rater's judgement.
- + A fit signal, never an automatic decision: a person makes the hiring call.

Measured across 8 behavioural competencies mapped to the role profile, via the VIFM online behavioural psychometric assessment. Fit score is the overall rating out of 5; the role bar is Competent (3/5); coverage is the share of competencies at or above the bar. Results are most relevant for the next ~24 months. For internal talent-acquisition use.
